

3-Legged Pup Has A Home--Fund For Strays Started

When Allendale Police Chief Kenneth Booth took it upon himself to grant a stay of execution to a homeless, three-legged, brindle dog not long ago because he "knew a well fed, three legged dog must be a lost pet," he was well rewarded for his patience.

Miss Lucine Lorrimore of Saddle River read the story in the Sunday News and telephoned Chief Booth saying that if the lost pet was not claimed, she would take it and try to find the pup a home. She now has three-leg.

Then the Allendale Animal Protective League sent Chief Booth a check for \$10 to start a fund for

the feeding and care of other dogs impounded under similar circumstances. A great part of the time the feed bill has been paid by the Chief from his own pocket.

Another dollar was added to the fund the other day when a Waldwick family reclaimed a pedigreed red setter that had wandered, and found itself in the protective custody of the kind hearted Allendale police. The \$1 was a voluntary contribution. "No charge," Chief Booth had told the owner.

Warn Delinquents

However, the matter of Allendale residents who are delinquent in getting 1947 licenses for their own pets is something else. Good nature and tolerance of neighbor's forgetfulness can be stretched only so far, the chief said. There'll be a business of summonses and fines for those who wait much longer to get 1947 dog tags. Male dogs \$1.00. Females \$2.25, per license.

Remittances may be sent to Borough Clerk C. R. Vollaro by mail. In case of renewals, the 1946 tag number is all the information required. New registrations should give dog's name, sex, age, color hair (long or short) and breed if known (otherwise fido is described as "mongrel.")

Plenty of hot water and preliminary "rinse" in a second rinse in fresh suds is effective in preserving the dazzle of any white fabric and easier on the clothes than bleaches.
