

Crestwood Lake, the largest natural lake in the State of New Jersey, devoted exclusively to bathing, is ideally situated in the foothills of the Ramapo Mountains, surrounded by more than a hundred acres of natural scenic beauty.

Fine motor highways, as shown on map, lead to it from all points and present an accessible place where the pleasure of the entire family is assured, whether it be bathing, swimming, picnicking, or any other open air recreation.

Where the kiddies can play in the sand or on the swings, seesaws, or water slides, and enjoy the many other playground facilities to their hearts' content.

An ideal spot to bask in the sun or rest in the shade of the woodland, where it is forever cool and restful.

Crestwood is the only lake of its size equipped with modern chlorinating, aerating, and filtering apparatus, designed to assure at all times the absolute purity of the water which is safeguarded further by frequent periodical tests made by a certified chemical laboratory.

The gradually sloping beaches and the constant attendance of the Club life guards make bathing and swimming safe for grown-ups and a paradise for children.

Modern lighting equipment makes evening bathing a pleasure and the large space for parking provides ample room for all.

Crestwood Lake is operated on a membership plan with certain protective restrictions to limit the membership to desirable people.

The membership plan makes it possible for the thrifty family to enjoy a season's pleasure most economically.

You are cordially invited to visit and inspect Crestwood Lake, which is open at all times, and where additional information, rates, etc., can be secured by applying at the Office of the Club, located at the entrance, or by telephoning Allendale 3147.
